## Hurt

## **Get Scared**

Oh yeah, oh yeahHow do you sleep through the night Where do you go when you hide Waiting for the truth to call I don't fear you anymoreHow do you think I'm alright It's the way I wait It's the way you've changedAnd I like the way you hurt inside Always waiting for the worst, to get me by And I like the way you hurt Does it really come Does it really come as a surprise Oh, yeah, oh, yeahFrom all the years that went by Through all of your shit I've survived You would have thought I had died But I made it out aliveHow do you sleep through the night It's the lies you gaveNow the rules have changedAnd I like the way you hurt inside Always waiting for the worst, to get me by And I like the way you hurt Does it really come Does it really come as a surpriseIt's no surprise It's no surprise It's the lies you gave Now the rules have changed And I like the way you hurt inside Always waiting for the worst, to get me by And I like the way you hurt After all you've done, look what I've become And I like the way you hurt inside Always waiting for the worst, to get me by And I like the way you hurt Does it really come It doesn't really come as a surprise
