Every Time I See You

Luke Bryan

It's like a bolt of lightning hits me in my chest Right out of the blue

Every time I see you, every time I see youTop of the world I'm standing rocking at my best Then I look like a fool

Every time I see you, every time I see youYou're like a wreck out on the highway

I can't look away and I can't pass through

You're like an early morning Monday

Bringing me down, messing with my moodI'd love to say I can hold myself together

But I can't help but come unglued

Every time I see you, every time I see you I wanna tell you everything I ever wanted to say

But I never do

Every time I see you, every time I see youI'm sure my steering wheel and dashboard Would love a good break but they feel it too

Every time I see you, why I gotta see you? You're like a wreck out on the highway I can't look away and I can't pass through

You're like a early morning Monday

Bringing me down, messing with my moodI'd love to say I can hold myself together

But I can't help but come unglued

Every time I see you, every time I see you, yeahOh, you're like a wreck out on the highway

I can't look away and I can't pass through

You're like an early morning Monday

Bringing me down, messing with my mood

I'd love to say I can hold myself together

But I can't help but come unglued

Every time I see you, every time I see you

Every time I see you, oh yeahOh, I'm walking down the street

And you walk right up to me and I freeze

Every time I see you
