## Sepultura

Endless war, endless screams  
In the boundaries of Hell we live  
Total death, total hate  
On the devastated plains we fight  
Evil minds, insane minds  
Mutilated corpses over the ground  
Soldiers of Hell, soldiers of death  
Seeking victims to exterminate  
Black death, black night  
Where the spirits leave their crypts  
Torture souls, drifting souls  
By the world of hate  
Multiradiation, multideath  
Destroys and kills  
Even in the deep of Hell  
Fallen corpse, fallen angel  
Total injury is the only ruleMAYHEMDeath slaughter, death rules  
Under the sign of fear we live  
Bestial lust, bestial rites  
Darkness send it's bestial warriors  
Shrill crys, tormenting crys  
Break the silence of the dark night  
Living with hate, living with death  
Giving the world total destruction  
Blood world, rotting world  
Corrosion of insane human mind  
Black pest, devastating pest  
Under the evoking circle we pray  
Baptized skulls, evil skulls  
People screaming chained underground  
There is no return, there is no escape  
In the evil refuge you are slavesMAYHEM
