

# Say Something New

## The Concretes

What a strange thing to say  
As you pass me  
On your way out  
And all the things  
I had in mind for you and me Well, say something new  
Well, say something new  
Something new What a strange thing to do  
As you passed me  
On your way out, your way out  
And all the things  
I had in mind for you and me  
Well, say something new  
Well, something new  
Something new But something you do  
But something you do  
Something you do Well, say something new  
Well, something new  
Something new  
But something you do  
But something you do  
Something you do Say something new  
Say something new  
About you, about you, about you
