

Shine

Laura Izibor

Wake up one morning you realize
Your life is one big compromise (compromise)
Stuck in the job you swore was only temporary (was only temporary) Feel like the world is
passing you by (do do do do do)
Never done all the things you would need to try
Stuck in a place, got a pain in your face from all your stressin' out (all your stressin' out)x2 You
ask yourself there's got to be more than what I'm living for (what I'm living for) x2
You ask yourself there's got to be something else, something more, more, more Well let the sun
shine on your face
And don't let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on you Feel like there's nothing so let it go
You try and fight but you can't let go
Roll the pain, got so much to gain
Now is the time
You ask yourself there's got to be something else, something more, more, more Well let the sun
shine on your face
And don't let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on you You ask yourself there's got to be more than what I'm
living for (what I'm living for) x2
You ask yourself there's got to be something else, something more, more, more Well let the sun
shine on your face
And don't let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on you Well let the sun shine on your face
And don't let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on you
Well let the sun shine on your face
And don't let your life go to waste
Now is the time, got to make up your mind
Let it shine on you, let it shine on you
