

# Once in a Lifetime

## One Direction

Once in a lifetime  
It's just right  
We make no mistakes  
Not even the landslide or riptide  
Could take it all the way Somehow, it feels like nothing has changed  
Right now, my heart is beating the same  
Out loud, someone's calling my name  
It sounds like you  
When i close my eyes  
All the stars are lined  
And you are by my side  
You are by my side Once in a lifetime  
It's just right  
That we are always safe Not even the bad guys, in the dark night  
Could take it all the way Somehow, it feels like nothing has changed  
Right now, my heart is beating the same  
Out loud, someone's calling my name  
And it sounds like you  
When i close my eyes  
All the stars are lined  
And you are by my side  
You are by my side  
You are by my side  
Once in a lifetime you were mine
