

# Song for the Summer

Morgan Evans

White sand, tan skin  
Red hot from the beginning  
Heartbeats racing  
Taste the salt on your lips that I was kissing  
Thought it would always be that way  
Till I felt the seasons change  
Maybe we weren't meant to last forever anyway  
Just like a song for the summer  
When we were young, we never thought it would end  
Just getting lost in each other, we'd play it till it's over  
Then play it all over again  
We sang along, long, long in the sunshine  
All night, so right till it was gone  
Just like a song, song for the summer, song for the summer  
Bare feet, low tide  
We were dancing in the water  
Cool breeze, your eyes  
Bluer than the sky, losing track of time  
Now every memory, like a melody  
I can't get out of my head  
Every single line that you said to me  
Takes me right back there  
Just like a song for the summer  
When we were young, we never thought it would end  
Just getting lost in each other, we'd play it till it's over  
Then play it all over again  
We sang along, long, long in the sunshine  
All night, so right till it was gone  
Just like a song, song for the summer, song for the summer  
(Song for the summer, song for the summer  
Song for the summer, song for the summer)  
Now every memory, like a melody  
I can't get out of my head  
Just like a song for the summer  
When we were young, we never thought it would end  
Just getting lost in each other, we'd play it till it's over  
Then play it all over again  
We sang along, long, long in the sunshine  
All night, so right till it was gone  
Just like a song, song for the summer, song for the summer  
(Just like a song, song for the summer, song for the summer)  
Just like a song, song for the summer, song for the summer  
(We were a song, song for the summer)
