

# Nothing On But the Stars

[Dierks Bentley](#)

You know we didn't get it right  
But it wasn't all wrong  
It wasn't just a phase  
And it isn't all gone  
Before we go and let the lonely  
Do what it does  
I want one more memory of us Nothing on but the stars, through the windowpane  
Burn your silver silhouettes into my brain  
I can't have you forever but I'll take tonight  
I wanna remember you right now just like you are  
With nothing on but the stars  
Yeah You can take your things  
And I'll take mine  
Before you go and leave it all behind  
I wanna drink you all in  
And soak you all in  
And watch those constellations  
Crawl across your skin Nothing on but the stars, through the windowpane  
Burn your silver silhouettes into my brain  
I can't have you forever but I'll take tonight  
I wanna remember you right now just like you are  
With nothing on but the stars My hands on your hips in the dark  
Nothing on but the stars, mmh  
'Cause I ain't ready to let you let me go, oh no  
Just give me one more night to hold you close, mmh  
With nothing on but the stars...  
I can't have you forever but I'll take tonight  
I wanna remember you right now just like you are  
With nothing on but the stars And my hands on your hips in the dark  
With nothing on but the stars, mmh Before we go and let the lonely  
Do what it does  
I want one more memory of us
