

# One Little Kiss (Never Killed Nobody)

Jake Owen

I saw your number on my phone  
I said yea I'm here alone  
I saw the lights, opened the door fore you rang my bell  
Yea how you've been and you leaned in  
And I just told myself One little kiss never killed nobody  
One little drink never wrecked no party  
Thought we were over baby  
But you kept getting closer baby  
One little touch never broke no heart girl  
But I always wanna finish what you start girl  
Now you don't understand me  
I keep moving and it's hard to breathe  
One little kiss never killed nobody but me  
Ain't going out, ain't getting drunk  
Don't need a shot to get messed up  
I'm thumbing through pictures of you, replaying our last night  
Thought I'd be fine to see you one more time, yea right One little kiss never killed nobody  
One little drink never wrecked no party  
Thought we were over baby  
But you kept getting closer baby  
One little touch never broke no heart girl  
But I always wanna finish what you start girl  
Now you don't understand me  
I keep moving and it's hard to breathe  
One little kiss never killed nobody but me I mean  
And shit I never would've listened when you whispered in my ear  
Last night  
When you said baby it's alright  
One little kiss never killed nobody  
One little drink never wrecked no party  
Thought we were over baby  
But you kept getting closer baby  
One little touch never broke no heart girl  
But I always wanna finish what you start girl  
Now you don't understand me  
I keep moving and it's hard to breathe  
One little kiss never killed nobody but me Nobody but me  
Nobody but me  
Nobody but me
