

End Transmission

AFI

Pull the top down, use your knees to drive
I'll make it worth your while, just let me taste the sky
You pressed your mouth on mine and fed me a star
And said "We never can truly know who we are"
Know who we are
With the lights out and the night inside
The broken radio was playing suicide
I felt myself falling. I confessed to you
"I saw a body." You said you'd seen a few
This night has only just begun
If there's discretion that you've not abandoned now's the time
We'll burn to best the morning's sun
Go grab your bag, I'll bring the gun, the gun
Keep the top down, use your knees to drive
I'll hide these words, they're only yours to find
You pressed your mouth on mine and said they'd call us stars
And said "We never can truly know who we are"
This night has only just begun
If there's discretion that you'd not abandon, now is the time
We'll burn to best the morning's sun
Go grab your bag, I'll bring the gun, the gun
Everything was burning bright,
Everyone was frightened,
You, said "Stay strong"
Everybody knowing that what we'd invited still
Remains when we're gone
This night has only just begun
If there's discretion that you'd not abandon, now is the time
We'll burn to best the morning's sun
Go grab your bag, I'll bring the gun
Oh!
This night has only just begun
If there's discretion that you'd not abandon, now is the time
We'll burn to best the morning's sun
Go grab your bag, I'll bring the gun, the gun
I'll bring the gun
Oh.
