

# CLEAR

## NEEDTOBREATHE

You are the moonlight in the sky that I'm persuing  
You are the reason for what I'm doing  
You are the crystal that keeps me from ruin  
You are the movement  
You're the true north phoning back home  
You are the constant, my constellation  
You're the steady hand of a ticking clocking that I've come to rely on Oh it's so clear  
Come a little closer all my love is right here  
I just want to hear you whispering you still trust  
You're the only thing that I have ever been sure of  
I just wanna be with you  
I promise I won't let you down  
Honey it's so clear now  
You are the full winds  
You're the catalyst of high hopes  
You are the beauty  
The sparks revival  
You're the oxygen inside these lungs that's giving life to my bones Oh it's so clear  
Come a little closer all my love is right here  
I just want to hear you whispering you still trust  
You're the only thing that I have ever been sure of  
I just wanna be with you  
I promise I won't let you down  
Honey it's so clear now  
Oh it's so clear  
Come a little closer all my love is right here  
I just want to hear you whispering you still trust  
You're the only thing that I have ever been sure of  
I just wanna be with you  
I promise I, I won't let you down  
Honey it's so clear now  
Honey it's so clear now  
It's so clear now I promise I won't let you done  
Honey it's so clear now  
Honey it's so clear now  
Honey it's so clear now  
It feels like heaven is coming down  
It's right here with me  
It's all around  
Once was so lost, but I am found  
When I'm with you  
No ones' watching  
The way you move

Body's dancing under the moon  
You always know just what to do  
When I'm with you  
When I'm with youWhen I'm with you  
When I'm with you
