

Stand by Your Gun

George Ezra

I wouldn't recommend what I have done
No the prophets pointed out where I went wrong
Singing, go figure our true desires
My darling, stand by your gun See we don't need, no nothing more,
We're quite attached to the forty-four,
Take a chance, take your words,
We fall down, we go there, we go anywhere My mistakes lit like embers on your tongue
In the foreground, you're still busy getting young,
Singing, go figure our true desires,
My darling, stand by your gun
See we don't need, no nothing more
We're quite attached to the forty-four
Take a chance, take your words,
We fall down, we go there, we go anywhere singing Go figure our true desires
My darling, stand by your gun See we don't need, no nothing more,
We're quite attached to the forty-four,
Take a chance, take your words,
We fall down, we go there, we go anywhere
Waste your time, on lessons learned
How long will you go, will you go, will you go? And,
Waste your time, on lessons learned
How long will you go, will you go, will you go? And,
Waste your time, on lessons learned
How long will you go, will you go, will you go? And,
Waste your time, on lessons learned
How long will you go, will you go, will you go? And -
