

# What If

Ashley Tisdale

Don't speak, I can't believe this is here happening  
Our situation isn't right  
Get real, who you playing with  
I never thought he'd be like this  
You were supposed to be there by my side When you say that you want me  
I just don't believe it  
You're always ready to give up  
and never turn around But what if I need you baby  
Would you even try to save me  
Or would you find some lame excuse to never be true  
What if I said I loved you  
Would you be the one to run to  
Or would you watch me walk away without a fight  
I'm so sick of worrying that ya  
gonna quit over anything  
I could trip and you'd let go like that  
And everything that we ever were  
seems to fade but not the hurt  
'Cause you don't know the good things from the bad When I say that I want you  
You know that I mean it  
And in my hour of weakness  
There's still time to try But what if I need you baby  
Would you even try to save me  
Or would you find some lame excuse to never be true  
What if I said I loved you  
Would you be the one to run to  
Or would you watch me walk away without a fight  
Every time I speak you try and stop me  
'Cause every little thing I say is wrong  
You say you're noticing but you never see  
This is who I really am that you can believe  
Makes me wanna know right now  
Is it me you'll live without  
Or would you change your mind But what if I need you  
But what if I need you baby  
Would you even try to save me  
Or would you find some lame excuse to never be true  
What if I said I loved you  
Would you be the one to run to  
Or would you watch me walk away without a fight  
Oh baby, what if I need you  
What if I need you

What if I need you
