

Brave

LZ7

Only the brave will go where he goes
Into the fire but never alone
We know you always near to home
Only the brave So who are the brave the brave are those they walk on fire the most made of
diamonds dressed in chrome go hard and they never go home
They have the hunger they have the drive theyll do anything to survive
the rave will stay and the brave will foght and thats when you see them shone so look in theese
eyes right here look in these eyes they got no fear im going down to the front line if im gonna
go down im going down trying Only the brave will go where he goes
Into the fire but never alone
We know you always near to home
Only the brave
