

# Heat Wave

Dub Fx

i feel the future coming like a heatwave  
it's burning our consciousness within  
step into the water all my sons and daughters  
it's time that we cry the flames away just gather around now  
it doesn't matter who you are  
just gather around now are we gonna keep on warring  
are we gonna keep ignoring  
will there be another morning  
my soul keeps on searching on  
through all the fire  
trying to burn away the pain  
but i step into the water away  
from the slaughter  
trying to cry away the flames  
just gather around now  
it doesn't matter who you are  
just gather around now are we gonna keep on warring  
are we gonna keep ignoring  
will there be another morning
