

# Lean

## The National

Everybody needs a prayer, and needs a friend  
Everybody knows the world's about to end  
Everybody wants to know what the end will be  
Everybody wants to look before they leave  
Everybody wants to sip of wine to drink  
Everybody wants a little more time to think  
Everybody needs a reason why they run  
Everybody wants to know what they're running from And I can see your fever's on the rise  
I can all the water in your eyes  
And I can see the way the water leads  
Love will lead us all to smithereens  
Dying is easy, I believe my love and my love relieves me  
Dying is easy, I believe my love and my love relieves me  
You said it was everything...  
Everybody takes forever to fall asleep  
Everybody's got a love they don't want to keep  
Everybody needs a prayer, and needs a friend  
Everybody knows the world's about to end And I can see your fever's on the rise  
I can see the water in your eyes  
And I can see the way the water leads  
Love will lead us all to smithereens  
Dying is easy, I believe my love and my love relieves me  
Dying is easy, I believe my love and my love relieves me  
You said it was everything...  
And I'm gonna let it in  
And I can see your fever's on the rise  
I can see the water in your eyes  
And I can see the way the water leads  
Love will lead us all to smithereens  
Dying is easy, I believe my love and my love relieves me  
Dying is easy, I believe my love and my love relieves me  
You said it was everything...  
And I'm gonna let it in
