

And the Sky Began to Scream

How to Destroy Angels

Worn the skin off both my knees
Waited oh so patiently
Staring straight into the sun
Never thought you would've come
No, no
No, no
Somewhere sits an empty throne
Like we've always kind of known
Variations on a theme
And the sky began to scream
I will, tear it down, to the ground, and build another one [x6]
I will, tear it down, to the ground, and build another one
(Deface, deface, to the ground, and build another one)
[Repeat]
