

Closer

Astrid S

In the beginning you were a stranger
But my outlines were drawn to the danger
And once I had taste of your flavour
Mhm, closer
So I'm keeping my eyes off you
When she put her hands on you
But later that night we do it again
I'm keeping my mind off you
When she got her body on you
But later that night we do it again Closer, pulling me closer
Closer, I want you closer
Tell her, tell her that it's over
Now we're closer
Closer
I think we both know that you should tell her
Kiss of my perfume is still on your sweater
This is the last time
It's for the better
Mhm, closer
Walking that door
When every part of me is reaching for you
With no apology
I know everybody hurts
But this base make it worse
What can I do to have you again? Closer, pulling me closer
Closer, I want you closer
Tell her, tell her that it's over
Now we're closer
Closer
So I'm keeping my eyes off you
When she put her hands on you
But later that night we do it again
I'm keeping my mind off you
When she got her body on you
But later that night we do it again Closer, pulling me closer
Closer, pulling me closer (pulling me ah ah)
Closer, I want you closer (I want you closer)
Tell her, tell her that it's over
Now we're closer
Closer Tell her, tell her that it's over
Now we're closer

Closer
