

Anniversary (feat. Joss Stone)

Lemar

Put on your red dress and this diamond necklace
Your love leaves me senseless, I dedicate tonight to you
'Cos we made it through another year, my love only gets stronger
And I'll be here the next year, same time, same place, same girl (They say, after the honeymoon)
The passion's almost gone
(But I feel as though our love)
Only just begun It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no
It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary Put on your best suit, I've got something for you
I'll cover you in kisses 'cos baby, I adore you
Your touch leaves me breathless and I only get weaker
I will be there regardless for my man, I'm glad you're my man
(This day always reminds me of)
The reason I'm with you
I'll never search for love again
I've found the truth in you It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no
It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary Forever I'll be here and waiting
(I'll stay the same though times are changing)
We were meant to be together, no one could love you better
Got a question for you
(Tell me, I'm the answer)
Baby, let's stay in love I love you
I love you too
It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no
It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no
It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary I love you
I love you too I love you
I love you too It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no
It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no
It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary It's our anniversary, celebrating you and me
Nowhere else I'd rather be, oh, no

It's our anniversary, a special day in history
I will love you endlessly, it's our anniversary
