

Crystal Express

Raury

Life is in the moment
And life is incoherent
And life is a thing that you chose to have inherent
You came here for a reason
But you can not remember it, yeah
And you might be frustrated
Might be confused and hyperventilated
Worried about the future
Pull up to the station
And climb up on the crystal express
As we, as we run
Days and stormy nights
Pray we'll find a way to the sun
Cause you give me life
Give it all before it's gone
And I'll give you life
Give you everything and more
And you give me life
Is it all we need and want
And I'll give you life
And we all, we all, we all, we all need light
Follow me my brother
Talk to me my sister
We can go wherever
And we can live forever
As we find illumination
Right up on the crystal express
We can face some problems
Trials and tribulations
Diamonds are for heating constant pressure for creation
You be at your true nirvana
You can ride the crystal express
As we, as we run
Days and stormy nights
Pray we'll find our way to be one
Cause you give me life
Give it all before it's gone
And I'll give you life
Give you everything and more
And you give me life
Is it all we need and want
And I'll give you life

And we all, we all, we all, we all need light
