

For a Better Day

Avicii

Hurt

On caution weep

With bleeding sky

I called your name

There was no one there

And in the cold and snow

I saw your face I sang the song for the little things

Magic call, but the joy you bring

Running it down the line

Wish you could find that love is a fragile thing

Magic call from a pretty thing

Maybe it might be time

For a better day

For a better day

For a better day

Straight, from the path of love

In the road of life

I tumble forward

But going on, I'mma keep it strong

I saw your face I sang the song for the little thing

Magic call, but the joy you bring

Running it down the line

Wish you could find that love is a fragile thing

Magic call from a pretty thing

Maybe it might be time

For a better day

For a better day

For a better day

For a better day

For a better day

For a better day

I sang the song for the little thing

Magic call, but the joy you bring

Running it down the line

Wish you could find that love is a fragile thing

Magic come from a pretty thing

Maybe it might be time

For a better day
