I've Seen the Saucers

Elton John

Tune in, wouldn't it be something

Rumors spreading into panic

I've seen movements in the clearing

Someone sent you something satanicI have to leave you, radar's calling

Outside somebody landed

Crazy wavelengths leave you helpless

Oh don't forget me I'm so strandedI wouldn't fool you but I've, I've seen the saucers

So many times I'm almost in tune

Watching them flying in formation

Thinking how I could be so immune

I've seen them, I've been there with them

I can tell you all you want to know

Something touched me and I was only sleeping

Wouldn't you, wouldn't you like to go? Star climbing into their planets

Systems won, controlled from birth

Empty living on this highway

Can you see me mother earth? It's so endless whirling onwards

Wonder what's cooking at home tonight

Maybe if I promise not to say a word

They can get me back before the morning lightI wouldn't fool you but I've, I've seen the saucers

So many times I'm almost in tune

Watching them flying in formation

Thinking how I could be so immune

I've seen them, I've been there with them

I can tell you all you want to know

Something touched me and I was only sleeping

Wouldn't you like to go?
