

When the Sun Goes Down

Selena Gomez & The Scene

Been a long day, waiting for the night to come
I check my Iphone
Let me see what's going on, going on, going on
Help me DJ, play my favorite song
Make the speakers shake, speakers shake Now everybody wants to sing along, sing along
When the night is here
The only thing on my mind is having a good time
when the moon appears
You can always hear us say
The party doesn't start til the sun goes down That's when everything starts moving
Everybody up when the sun goes down
Ah ah ah
The music isn't on till it's way too loud
That's when everybody starts dancing
Everybody shout when the sun goes down
When the sun goes down
When the sun goes down When the sun goes down
Oh oh oh oh yeah
Pushing my hands up I'm feeling good now
On the dance floor
We can turn it inside out, inside out
When the night is here
The only thing on my mind is having good time with my friends
That's real, you can always hear us say
The party doesn't start till the sun goes down
That's when everything starts moving
Everybody up when the sun goes down
Ah ah ah
The music isn't on till it's way too loud
That's when everybody starts dancing
Everybody shout when the sun goes down When the sun goes down
When the sun goes down
When the sun goes down Oh oh oh oh yeah
Down down down
The sun is going down down down
When the moon appears, you can always hear us say
When the stars come out, you can always hear us say
Oh oh oh oh, yeah
The party doesn't start till the sun goes down
That's when everything starts moving
Everybody up when the sun goes down
Ah ah ah

The music isn't on till it's way too loud
That's when everybody starts dancing
Everybody shout when the sun goes down
When the sun goes down
When the sun goes down
When the sun goes down
When the sun goes down
When the sun goes down
When the sun goes down
Oh oh oh yeah
