

# When the Sun Goes Down

## Selena Gomez & The Scene

Been a long day, waiting for the night to come  
I check my Iphone  
Let me see what's going on, going on, going on  
Help me DJ, play my favorite song  
Make the speakers shake, speakers shake Now everybody wants to sing along, sing along  
When the night is here  
The only thing on my mind is having a good time  
when the moon appears  
You can always hear us say  
The party doesn't start til the sun goes down That's when everything starts moving  
Everybody up when the sun goes down  
Ah ah ah  
The music isn't on till it's way too loud  
That's when everybody starts dancing  
Everybody shout when the sun goes down  
When the sun goes down  
When the sun goes down When the sun goes down  
Oh oh oh oh yeah  
Pushing my hands up I'm feeling good now  
On the dance floor  
We can turn it inside out, inside out  
When the night is here  
The only thing on my mind is having good time with my friends  
That's real, you can always hear us say  
The party doesn't start till the sun goes down  
That's when everything starts moving  
Everybody up when the sun goes down  
Ah ah ah  
The music isn't on till it's way too loud  
That's when everybody starts dancing  
Everybody shout when the sun goes down When the sun goes down  
When the sun goes down  
When the sun goes down Oh oh oh oh yeah  
Down down down  
The sun is going down down down  
When the moon appears, you can always hear us say  
When the stars come out, you can always here us say  
Oh oh oh oh, yeah  
The party doesn't start till the sun goes down  
That's when everything starts moving  
Everybody up when the sun goes down  
Ah ah ah

The music isn't on till it's way too loud  
That's when everybody starts dancing  
Everybody shout when the sun goes down  
When the sun goes down  
When the sun goes down  
When the sun goes down  
When the sun goes down  
When the sun goes down  
When the sun goes down  
Oh oh oh yeah
