

# Sounds of Summer

Dierks Bentley

It's a tractor firin' up  
Kids playin' in a field  
Four wheels gettin' stuck  
A line singin' out a fishin' reel  
It's a cooler slidin' in the bed of a truck  
A tin roof drippin' rain  
Your baby sayin', come pick me up  
Take me down to the riverbank  
These are sounds going down in a nowhere town  
Underneath the wide open sky  
It's the dust in the air and the freedom everywhere  
Can't you hear it coming alive?  
Makes you wanna drop it down a gear  
And kill a couple of beers  
Been waiting all year, now it's finally here  
Back around, these are the sounds of summer  
It's the flick of a lighter lighting up a little smoke  
Boots climbing barbwire, a little spot nobody goes  
Lawn chairs breaking out in the yard to the firework boom  
Hearing a heart beating in the dark, saying that she wants to  
These are sounds going down in a nowhere town  
Underneath the wide open sky  
It's the dust in the air and the freedom everywhere  
Can't you hear it coming alive?  
Makes you wanna drop it down a gear  
And kill a couple of beers  
Been waiting all year, now it's finally here  
Back around, these are the sounds of summer  
Yeah the sounds of summer  
Round here that's what it's all about  
So listen up and look around  
It's who we are, it's what we love  
So tonight let's crank 'em up  
These sounds going down in a nowhere town  
Underneath the wide open sky  
It's the dust in the air and the freedom everywhere  
Can't you hear it coming alive?  
It goes way too fast, it all disappears  
And when it's gone, we'll still be here  
Hanging 'round, missing the sounds of summer  
Missing the sounds of summer  
The sounds of summer

Yeah, the sounds of summer
