Love Riot

Newsboys

If these streets could talk They'd tell us things Of shattered hearts and wars unseen It's a battle we can't win alone We need saving desperately He made a way, said follow Me Give up your life for something more Oh, what are we waiting for Let's take it around the world We'll start a fight and join the fight In this love riot Oh, ready, set, here we go From London (New York) to Tokyo You gotta unite and Join the fight in this love riot We are an army of the truth We're on the march to rescue you Don't have to make it on your own We're holy rebels and when we yell The mountains fall, the oceans swell This is the time to let them know We'll take to the streets, yeah We'll take to the streets Exploding with love He's already won this, already won this What are we waiting for What are we waiting for
