

# Low

## Wage War

Don't keep on telling me that  
I'm gonna pull through  
When you don't know low like I do I'm afraid of the things I don't say  
The thoughts in my head that  
Keep me tossing, turning, lying awake  
Don't keep on telling me  
That I'm gonna pull through  
When you don't know low like I do I've been running away again  
I've been running away again I've been running away again  
Chasing after all the battles I can never win  
I don't think that I can take much more  
It feels like I've lost it all (Lost it all)  
Who will save me when I can't save myself?  
Hard to think we were born to live this way  
Burning bridges, ripping stitches out to drown the pain  
Bleed me out, run me dry, watch the hammer fall  
Let the river run and bury me beneath it all Bury me  
Bury me beneath it all I've been running away again  
Chasing after all the battles I can never win  
I don't think that I can take much more  
It feels like I've lost it all (Lost it all)  
Who will save me when I can't save myself? Searching for answers  
A cure for this cancer  
It's all in my head  
I'm one step from the edge  
I've been running away again  
Chasing after all the battles I can never win  
I don't think that I can take much more  
It feels like I've lost it all  
I've been running away again  
Chasing after all the battles I can never win  
I don't think that I can take much more  
It feels like I've lost it all (Lost it all)  
Who will save me when I can't save myself?  
(Save myself)  
Who will save me when I can't save myself? Who will save me when I can't save myself?
