

Last Goodbye (feat. Tove Stryke & Stefflon Don)

Clean Bandit

[Tove Stryke:]

I raise my voice, you slam the door
I don't let up til your hearts on the floor
Losing our minds, scream and we shout
Til we forget what we fighting about
Turns me into a monster
We're no good for each other
Lying in bed, miles apart
We're side by side and alone in the dark There's no going back
Back to when things were easy
But there's something that I'd like to do
Right before you leave me
If this really is the end
Then why don't you please come back to bed
Come on and spend the night
And let's say our last goodbye
Baby don't walk away
Don't wanna remember you this way
Come on and spend the night
And let's say our last goodbye [Stefflon Don:]

I twist a nerve, I know it hurts
It's time to stop boy we both make it worse
Tossing and turns, you get no sleep
I speculate on the secrets you keep
Turn him into a monster
We're no good for each other
We should be done, both of us know
Deep down the truth is we're better alone

[Tove Stryke:]

There's no going back
Back to when things were easy
But there's something that I'd like to do
Right before you leave me [Stefflon Don:]
Like we're just crying off a liquor kiss
[?] string

Forget about the phone when I ring
Grooving at the backseat, move up on me
I will not forget anything
Then we heading up from [?]
It's been only 50 seconds

I've been all up on you now
It's so sad to see that we couldn't be all up in the clouds
And it's the last time I'll be all up in your mouth[Tove Stryke & Stefflon Don:]
[?]

There's no going back
Back to when things were easy
But there's something that I'd like to do
Right before you leave melf this really is the end
Then why don't you please come back to bed
Come on and spend the night
And let's say our last goodbye
Baby don't walk away
Don't wanna remember you this way
Come on and spend the night
And let's say our last goodbye
