

All About Us

Jordan Fisher

Fly away with me baby
I've been falling for days, been lost in the maze; I hope you can save me
Cause we're going higher
We could both touch the sky
Let's follow the signs, love So let's start it off like we'll never stop
Baby just be still; let your body talk to me
I'll give you everything you need
We could run away, take you to that place, so let down your hair, baby set your mind at ease
We'll be living in a dream
Cause tonight, the stars are shining bright
Aligned for you and I
No, it's not about luck
This is all about us, this is all about us
So why, don't we live like we're alive?
Gotta open up our eyes
No, it's not about luck
This is all about us, this is all about us Fly away with me baby
Let me show you a world where pain don't exist
If you could begin to come with me for a minute, yeah
I'll give you the things I know you're been missing, oh
So let's start off like we'll never stop
Baby just be still; let your body talk to me (oh woah)
I'll give you everything you need (everything you need, yeah)
We could run away, take you to that place, so let down your hair, baby set your mind at ease
(set your mind)
We'll be living in a dream
(cause tonight) Cause tonight, the stars are shining bright
Aligned for you and I
No, it's not about luck
This is all about us, this is all about us
So why, don't we live like we're alive?
Gotta open up our eyes
No, it's not about luck
This is all about us, this is all about us It's a feeling that you'll get when you really love
somebody
And your worlds start to colliding
(Hey, hey)
In the moment you were blinded by a voice we can't control it
And I think that now we know it, yeah We could run away, take you to that place, so let down
your hair, baby set your mind at ease
We'll be living in a dream Cause tonight, the stars are shining bright
Aligned for you and I

No, it's not about luck
This is all about us, this is all about us
So why, don't we live like we're alive?
Gotta open up our eyes
No, it's not about luck
This is all about us, this is all about us
