

# This Orient

## Foals

And now it's just gone after dark  
And we move to the other part of it  
Secret part of your restless heart  
To glide past every city light  
Like a satellite careering through the sky  
This color, this summer night  
It's your heart, it's your heart  
That gives me this western feeling  
It's your heart, it's your heart  
That gives me this western feeling  
Do you know, you give me  
You give me this western feeling?  
Now look back see how far you've come  
Will you unravel in the sun?  
Come undone, find your place  
Held up high said from string as well  
No return to that restless place  
You've reached it, you've found your grace  
It's your heart, it's your heart  
That gives me this western feeling  
It's your heart, it's your heart  
That gives me this western feeling  
Oh, do you know, you give me  
You give me this western feeling?  
It's your heart, it's your heart  
That gives you this western feeling  
It's your heart, that gives you  
That gives you this western feeling  
It's your heart that gives you  
That gives you this western feeling  
It's your heart, it's your heart  
That gives you this western feeling  
Oh, how do you know, what gives me  
What gives me this western feeling?  
Oh, how do you know, what gives me  
What gives me this western feeling?
