

Learn To Fly

Surfaces & Elton John

[Surfaces:]

All the broken people, put your hands up high
If you lift them up you might just touch the sky
All the lonely people, put your hands up high
If you loosen up you might just learn to fly All the highs and the lows and the way it all goes

You can't let them keep you down
If you're lost, if you're broke, if you're stuck on a road
You can turn it all around 'Cause we gotta trust in love
Something that can't be touched

A feeling to lift us up

All in the name of love

All the broken people, put your hands up high
If you lift them up you might just touch the sky
All the lonely people, put your hands up high
If you loosen up you might just learn to fly Learn to fly

Learn to fly

Learn to fly

Learn to fly [Elton John:]

Sometimes it gets difficult

When everything's the same

You toss and turn

Push and pull

You don't know who to blame

But there is always something to hold on to in your life

Just keep that head up, don't you worry

It will be alright

[Surfaces:]

All the broken people, put your hands up high
If you lift them up you might just touch the sky
All the lonely people, put your hands up high
If you loosen up you might just learn to fly All the broken people, put your hands up high

If you lift them up you might just touch the sky

All the lonely people, put your hands up high

If you loosen up you might just learn to fly Learn to fly

Learn to fly

Learn to fly
