Collide (feat. Avicii)

Leona Lewis

I'll pick you up when you're down

Be there when no one's around

When you're in unfamiliar places

Count on me through life's changesI'm in tune with how you feel

Everything bout this is real

When you're in unfamiliar places

Count on me through life's changes You're all I want, yeah yeah

I know you're the one, yeah

You're all I want, yeah

I know you're the one, yeahCrash into me

At full speed

Crash into me

We can collide, we can collide

Crash into me

At full speed

We can collide, we can collide

We can collide, we can collideCrash into meWe can collide, we can collide

We can collide, we can collideWhen you're in unfamiliar places

Count on me through life's changesKnow that you're never alone

In me you can find a home

When you're in unfamiliar places

Count on me through life's changes You're all I want, yeah (yeah)

You're all I want (oh), yeah (yeah yeah)

You're all I want, yeah (you are the one)

I know you're the one, yeah (you are)

Crash into me

At full speed

We can collide, we can collide

We can collide, we can collideCrash into me

We can collide, we can collide

We can collide, we can collide we can collide

We can collide, we can collide
