

# Lift Off (feat. Chino Moreno & Machine Gun Kelly)

Mike Shinoda

[Intro: Chino Moreno]

I'm off of the earth, on a ride alone [Verse 1: Mike Shinoda]

Yeah!

Liftoff like Virgin Galactic

My Richard's too Branson to fuck with you bastards

Very legendary that's some matter of fact shit

You're the opposite of stars like rats spelled backwards

I flow poems out to Saturn and past it

Easy as a standard anti-gravity backflip

Satellite tracking can't map up my tactics

I spit the same shit they split an atom in half with

No, it's not what I want but it had to be

I spent six months just rechargin' my battery

Imagine me quittin' what a travesty that'd be

You space shuttle challengers are nothin' but tragedies

So take care on the path that you're headed

I'm the father to your star, don't you ever forget it

I don't drop mikes, only let it smoke where I said it

And I don't play, even when they press it, get it?

[Chorus: Chino Moreno]

I'm off of the earth, on a ride alone

I'm driftin' away, out of time, I flow

Away from the truth, away from the night

Away from the day

I'm off of the earth, on a ride alone [Verse 2: Machine Gun Kelly]

Please brace for impact

Must have went to space, and got sent back

But I'm still intact, in fact

Take a picture of me, you could see that I'm a star with your lens cracked, supernova

It's Caesar's Palace startin' on my opponents' 'cause history will show

We done been to war like Romans

Did that dance with the devil

Hell, hot as a kettle, so it's no wonder why I put this ice on all of my metal

And wear that shit like a medal

Used to think I was a joker, no Jared Leto, when I said I'd get us out the ghetto

Slam my foot on the pedal, booked a studio and I couldn't afford instrumentals, fuck it, record  
acapella

Flying coach, streaming Coachella until they banned me

Now they like Bambi's mother - dead - I'm onto these Grammy's

I'm rolling these grams gladly

Purple and green like Daphne  
Shades on like Velma, hair long like Shaggy  
Crushin' addies in my water got my voice raspy  
Haven't slept since California and that shit was last week  
Paranoid when I sleep, but when I'm high I'm happy  
That's why I need to kiss the sky when I get stuck in the valley  
Lift off!

[Chorus: Chino Moreno]

I'm off of the earth, on a ride alone  
I'm drifting away, out of time, I flow  
Away from the truth, away from the night  
Away from the day  
I'm off of the earth, on a ride alone
