

I Don't Care

Twin Shadow

Let me know you're innocent
And tell me all the things you've done
And talk about the parties
And them boys that you got them done I don't care, I don't care
Long as you can dance me around the room
While you lie to me Wailing all the words
That have never disappeared your mouth
And brag about your first time
In the baffled storm
I don't care, I don't care
Long as you can dance me around the room
While you lie to me You were sitting home on a friday night
I was ready to dance
You were looking to fight
So you whisper something softly
In the telephone
You were looking to get it
'Cause your daddy's not home
So I came to you in the light
And I told you the truth
And you cried Before the night is thru
I will say three words
I probably meant the first two
And regret the third
(Chorus/Outro)
I don't care, I don't care
Long as I can dance you around the room
While I lie to you
Long as we can dance me around the room
While we lie
Long as you can dance me around the room
While you lie to me
Long as we can dance me around the room
While we lie
