

Love Is Our Weapon

Never Shout Never

Hey everybody take a look around
Put your money where your mouth is
Take your eyes off the ground
We got a hard day coming if we can't work out
All the pissy little problems that were fightin' aboutaye! See, I never got involved with politics
'cause they always brought out the worst in my folks
But I always swore to them if I could make a change at all
I'd love this world before it implodes
We all want change
And we want it now Hey everybody take a look around
Put your money where your mouth is
Take your eyes off the ground
We got a hard day coming if we can't work out
All the pissy little problems that were fightin' aboutaye! Love is the weapon for this lukewarm
congregation
Love is the only thing that's kept me believing
Love is the weapon for this wounded generation
Love is the only thing that's kept me believing That the world will change
(world will change)
We all want change
(want it now)
Hey everybody take a look around
Put your money where your mouth is
Take your eyes off the ground
We got a hard day coming if we can't work out
All the pissy little problems that were fightin' aboutaye!
