

# Love Is Our Weapon

## Never Shout Never

Hey everybody take a look around  
Put your money where your mouth is  
Take your eyes off the ground  
We got a hard day coming if we can't work out  
All the pissy little problems that were fightin' aboutaye! See, I never got involved with politics  
'cause they always brought out the worst in my folks  
But I always swore to them if I could make a change at all  
I'd love this world before it implodes  
We all want change  
And we want it now Hey everybody take a look around  
Put your money where your mouth is  
Take your eyes off the ground  
We got a hard day coming if we can't work out  
All the pissy little problems that were fightin' aboutaye! Love is the weapon for this lukewarm  
congregation  
Love is the only thing that's kept me believing  
Love is the weapon for this wounded generation  
Love is the only thing that's kept me believing That the world will change  
(world will change)  
We all want change  
(want it now)  
Hey everybody take a look around  
Put your money where your mouth is  
Take your eyes off the ground  
We got a hard day coming if we can't work out  
All the pissy little problems that were fightin' aboutaye!
