

Unstoppable (FKJ Remix)

Lianne La Havas

I'll wait a little longer
We're weak and getting stronger
I know it's taking the time to heal
We'll be unstoppable
Don't know what I did it for
I needed to know that it was always real
My hands held high when we walk down the line,
honey
I'm in awe through the clear night sky
Let's be at peace, we'll fly
Our hearts collide
And escape the magnetic side
I was like a satellite spinning away
Almost lost forever and leaving no space
Floating through the darkest reaches of space
To another galaxy
Our polarity shifting around
There is nothing else left holding us down
But it's just gravitational
We are unstoppable
I just can't escape the pull
We are unstoppable
It's just gravitational
We are unstoppable
My hands held high when we walk down the line, honey
I'm in awe through the clear night sky
Let's be at peace, we'll fly
Our hearts collide
And escape the magnetic side
I was like a satellite spinning away
Almost lost forever and leaving no space
Floating through the darkest reaches of space
To another galaxy
Our polarity shifting around
There is nothing else left holding us down
But it's just gravitational
We are unstoppable
I just can't escape the pull
We are unstoppable
It's just gravitational
We are unstoppable
The stars will guide the way
In the dead of space
You will be my one and only
We are unstoppable

We are unstoppable
We are unstoppable
We are unstoppable
Oh, oh, oh!The stars will guide the way
In the dead of space
You will be my one and only
