

War of Change

Thousand Foot Krutch

It's a truth that in love and war
World's collide and hearts get broken
I want to live like I know I'm dying
Take up my cross, don't be afraid
Is it true what they say, that words are weapons?
And if it is, then everybody best stop steppin'
Cause I got ten in my pocket that'll bend ya locket
I'm tired of all these rockers sayin' come with me
Wait, it's just about to break, its more than I can take
Everything's about to change
I feel it in my veins, its not going away
Everything's about to change. It creeps in like a thief in the night
Without a sign, without a warning
But we are ready and prepared to fight
Raise up your swords, don't be afraid
Is it true what they say, that words are weapons?
And if it is, then everybody best stop steppin'
Cause I got ten in my pocket that'll bend ya locket
I'm tired of all these rockers sayin' come with me
Wait, it's just about to break, its more than I can take
Everything's about to change
I feel it in my veins, its not going away
Everything's about to change. This is a warning, like it or not
I break down, like a record spinning
Gotta get up
So back off
This is a warning, like it or not
I'm tired of listenin', I'm warning you, don't try to get up
There's a war going on inside of me tonight, don't be afraid
There's a war going on inside of me tonight, don't be afraid
Wait, it's just about to break, its more than I can take
Everything's about to change
I feel it in my veins, its not going away
Everything's about to change
It's just about to break, its more than I can take
Everything's about to change
I feel it in my veins, its not going away
Everything's about to change
