

Medicine Man

Charlotte OC

Hot in the night, cold in the morning
The spirit alive is calling my name
The healer inside will pray for the lonely
Remember the time you stole me away
You didn't know me but once in my veins
You had a whole but nothing to say
You got it all now the spirit alive is calling my name
I don't know what you do but it's making me better
Can we lay down, lay down together?
I'ma take you like a drug; can you take me to heaven?
Can you love, can we love, can we love, can we love forever?
Cause I want you
I want you
I want you, medicine man
Send me a sign, send me no warning
I never know why my heart's on a chain
