

# Allison

## Pixies

From distant star to this here bar  
The me, the you, where are we now?  
Hooray the blues of everyone  
Allison...  
Keeps a smile around a while  
He took no fright and jettisoned  
We'll go tonight to hear him tell Oh well...Allison  
Allison...  
And when the planets hit the sun  
I saw the face of Allison  
Allison  
Allison  
Allison
