

# Never Ending

[Rihanna](#)

Ghost in the mirror  
I knew your face once, but now it's unclear  
And I can't feel my body now  
I separate from here and now A drug and a dream  
A lost connection, oh, come back to me  
So I can feel alive again  
As soul and body try to mend It's pulling me apart this time  
Everything is never-ending  
I slipped into a parallel  
They'll never understand  
This feeling always gets away  
Wishing I could hold on longer  
Why does it have to feel so strange  
To be in love again, be in love again, be in love again? Ghost in the mirror  
I knew your face once, but now it's unclear  
And I can't feel my body now  
I separate from here and now It's pulling me apart, this time  
Everything is never-ending  
I slipped into a parallel  
They'll never understand  
This feeling always gets away  
Wishing I could hold on longer  
Why does it have to feel so strange  
To be in love again, be in love again, be in love again? Be in love again?
