

# Oceans (feat. Greyson Chance)

tyDi & Jack Novak

I fell in oceans with you  
We swim around all the others  
And dove right in the blue  
I see new color with you  
We lose our sense of time  
Fade into something new  
I fell into the deep end

Hmm...

You sought to rise above me  
I tried to pull you in  
Now all that I can dream of  
Is a place where you're my love  
But you know everybody  
And you found somebody, who knows what I knew  
Still want to fall with you  
I want to fall in the oceans like we used to do  
You know everybody  
And you found someone, yeah, you think that is true  
Still want to fall with you  
I want to fall in the oceans like we used to  
I'm feeling pressure right now  
I need a pick me up but  
Babe you're not around  
They drop into the water  
I'm living in a dream  
I feel into the deep end

Hmm...

You sought to rise above me  
I tried to pull you in  
Now all that I can think of  
Is a place where you're my love  
But you know everybody  
And you found somebody who knows what I knew  
Still want to fall with you  
I want to fall in the oceans like we used to do  
You know everybody  
And you found someone, yeah, you think that is true  
Still want to fall with you  
I want to fall in the oceans like we used to do  
But you know everybody  
But you know everybody
