A Heart With Your Name On It

Billy Ray Cyrus

Billy Ray CyrusGirl I've got somethin' just a waitin' for you That's gonna make you smile and never leave you blue I've carried it around waiting for the right time To give it to you and make you mine Just give it a chance and you're gonna want it 'Cause I've got a heart with your name on itIt beats strong and it beats true And you'll love the love that it's gonna give you You might as well take it, you already own it I've got a heart with your name on it I've got a heart with your name on it I could feel the heat when I look in your eyes You were carving your name with a burning fire Now I'm a brand new man, branded with the thought of you Holding me tight the whole night through All you've gotta do is say that you want it 'Cause I've got a heart with your name on itIt beats strong, it beats true And you'll love the love that it's gonna give you You might as well take it you already own it I've got a heart with your name on itInstrumental Well...

It beats strong and it beats true
And you'll love the love that it's gonna give you
You might as well take it, you already own it
I've got a heart with your name on it
I've got a heart with your name on it
I've got a heart with your name on it...
