

# Something Broken

**John Hiatt**

There's something broken in my heart  
Oh it was nothing you done  
There's something broken in my heart  
I guess that's just the way it comes There's something broken in my heart  
Something I just can't fix  
There's something broken  
Something broken in my heart I've tried every powder and every pill  
To put it back together somehow  
Rode high with the fool up on the hill  
Come down with the draft horse and the plow  
I've been to the land of milk and honey  
And honey I'm broke down now  
There's something broken  
Something broken in my heart I'm gonna go downtown tonight and find me a woman  
Try to keep those jagged from my mind  
And if I don't start a fight I'll just keep running  
'Till I break on through into the morning light There's something broken in my heart  
Oh it was nothing you done  
There's something broken in my heart  
I know I'm not the only one  
There's something broken in my heart  
Something I just can't fix  
There's something broken  
Something broken in my heart
