

Electric Funeral

Black Sabbath

Reflex in the sky
Warn you you're gonna die
Storm coming, you'd better hide
From the atomic tideFlashes in the sky
Turns houses into sties
Turns people into clay
Radiation minds decayRobot minds of robot slaves
Lead men to atomic graves
Plastic flowers, melt in sun
Fading moon falls upon
Dying world of radiation
Victims of mad frustration
Burning glow by obscene fire
Like electric funeral pyreBuildings crashing down
To Earth's cracking ground
Rivers turn to wood
Eyes melt into bloodEarth lies in deathbed
Clouds cry for the dead
Terrifying Rain
Ease the burning painElectric funeral
Electric funeral
Electric funeral
Electric funeral
And so in the sky
Shines the electric eye
Supernatural king
Takes earth under his wing
Heaven's golden sings
Hell's angels flap their wings
Evil souls fall to Hell
Ever trapped in burning cells
