

# My Generation (feat. Lil Wayne & Joss Stone)

## Nas & Damian "Jr. Gong" Marley

Your generation will make a change  
This generation will make a change  
(Yes we will)

My generation will make a change  
This generation will make a change  
(Do You hear me now)

My generation will make a change  
This generation will make a change  
(we bout to make a change)

Now mi love fi see the schoolas dem a graduate  
A study hard and save the party for the holidays  
Diplomatic with dem Diploma  
And them bound fi great

Because dem nah pick up no matic and a perpetrate  
And then I love the energies whe dem a generate  
My Generation it so special it will make a change  
Because the elders sew the seed and it a germinate  
So anytime dem see the progress dem a celebrate  
Because we rising up despite of the economy  
And then a we a star the show like the astronomy  
And how we keep on breaking through is an anomaly  
Because we keep remaining true without apology  
The mission ha to carry through and finish properly  
Say Gambia to Guadeloupe Paris to Napoli

Say Zambia to Honolulu back to Tripoli And everybody want a future living happily

My generation will make a change  
This generation will make a change  
(Yes we will)

My generation will make a change  
This generation will make a change  
(Do You hear me now)

My generation will make a change This generation will make a change  
(we bout to make a change) Can you blame my generation, subjected gentrification

Depicting their frustrations over ill instrumentation  
Cause music is the way to convey to you what I'm facing  
Placing my life in front of your eyes for your observation  
Now if you can't relate then maybe you are too complacent  
Athletes today are scared to make Muhammad Ali statements

Whats up with your motto?  
Will you lead? Will you follow?

Improve your values  
Education is real power

I reach em like Bono  
 So get rid of your self sorrow  
 Add some bravado  
 Get wealthy likes Wells Fargo  
 Its truth, that I am you  
 And I am proof  
 Surviving through  
 We do what we gotta do  
 Yo we could break the cycle let nobody lie to you  
 Then maybe put our sons and our daughters  
 in private school  
 Cause there's a mission we gotta finish before we leave  
 This generation is destined to do historic deeds.  
 My generation will make a change  
 This generation will make a change  
 (Yes we will)  
 My generation will make a change  
 This generation will make a change (Do You hear me now)  
 My generation will make a change  
 This generation will make a change  
 (we bout to make a change) Uhh if you weather that storm  
 Then that rain bring sun  
 Been a long time comin  
 I know change gone come  
 Man I gotta keep it movin to the beat of my drum  
 Last night I set the future at the feet of my son  
 But they thinkin that my generation gotta die young  
 If we all come together then they cant divide one  
 Don't worry bout it just be about it  
 Got a message from god heaven too crowded  
 But I say hey young world you've never looked betta  
 And I heard change started with man in the mirror uhhh  
 This generation  
 I'mma represent  
 A generation led by a black president  
 Now hows that for change  
 Who knew that could change  
 I don't even look at the flag the same hey ughhh  
 So when you finish readin revelations  
 Thank god for my generation  
 My generation will make a change  
 This generation will make a change  
 (Yes we will)  
 My generation will make a change  
 This generation will make a change  
 (Do You hear me now)  
 My generation will make a change  
 This generation will make a change  
 (we bout to make a change)
