

In the Air (feat. Keri Hilson)

Chipmunk

In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care What is everybody afraid of me for
See the age I came through, I weathered the storm
I'm playing with thunder and firing myself
They making it rain? We making it hail You wanna visit fire? I'll throw 'em to hell
They can't see me, but they feel me, I'm basically Braille
You're looking at the holy grail
And this is what I wanna make, I don't care if it sells
Put them lighters up
(Come on, put them in the air)
Put them lighters up
(Everybody, everywhere) Put them lighters up
(High where I can see)
Put them lighters up
So you can shine like me In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care
Why you acting like you ain't heard of me?
This is sick to you, it's a to me
And everybody's getting bills, now
'Til every freaking label refunding me Yeah, you can't replicate my style
I'm on my high horse, no realm
And you're looking at the holy grail
And this is what I wanna make, I don't care if it sells Put them lighters up
(Come on, put them in the air)
Put them lighters up
(Everybody, everywhere) Put them lighters up
(High where I can see)
Put them lighters up
So you can shine like me In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
