

In the Air (feat. Keri Hilson)

Chipmunk

In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care
In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care
What is everybody afraid of me for
See the age I came through, I weathered the storm
I'm playing with thunder and firing myself
They making it rain? We making it hail
You wanna visit fire? I'll throw 'em to hell
They can't see me, but they feel me, I'm basically Braille
You're looking at the holy grail
And this is what I wanna make, I don't care if it sells
Put them lighters up
(Come on, put them in the air)
Put them lighters up
(Everybody, everywhere)
Put them lighters up
(High where I can see)
Put them lighters up
So you can shine like me
In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care
In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care
Why you acting like you ain't heard of me?
This is sick to you, it's a to me
And everybody's getting bills, now
'Til every freaking label refunding me
Yeah, you can't replicate my style
I'm on my high horse, no realm
And you're looking at the holy grail
And this is what I wanna make, I don't care if it sells
Put them lighters up
(Come on, put them in the air)
Put them lighters up
(Everybody, everywhere)
Put them lighters up
(High where I can see)
Put them lighters up
So you can shine like me
In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care
In the air, in the air

Put your lights up in the air
In this moment, come together
Be as one without a care Yeah, this is straight up, you can't eff with me music
Never chose this, it's destiny music
This ain't lover music, it's confidence crushing music
There ain't too many that I'm cool with I'm just tryna take it where no one else has took it
Yes, I am a novelty, hence all the bookings
Never touched a drop, but they smell what I'm cooking
I did it without looking whilst you can't get a look at you Put them lighters up
(Come on, put them in the air)
Put them lighters up
(Everybody, everywhere) Put them lighters up
(High where I can see)
Put them lighters up
So you can shine like me In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
Put your lights up in the air
In this moment, come together
Be as one without a care In the air, in the air
