## **Speak Easy**

## **311**

If there's a scream inside of you Just let it go You're beating yourself up baby Don't you know You've got to get through And lift the roof off your soulIt's like the pain locked In the part of your heart It's never gonna leave it Unless you start To warm it up Be wise and be smartOut on the ocean There's no one around No one to hear a sound It's just us out here Out on the ocean Speaking free Away from the city Away from the ears that Bug us and judge us It's so liberating To be free And my heart slows downNice and easy And your breathing will be pleasing Just speak easy And say what's on your mind I search for something To compare you to Thought long and hard For a simile true Now I'm suddenly aware End the quest you're beyond compare So speak easy If there's a shadow in your life Then there's sunshine Things turning inside out All the time Just rewind It's all in your mindOh so speak easy Out here we're floating Late in the night And the only light to guide us is a Full moon that's glowing

On the seaNice and easy
And your breathing will be pleasing
Just speak easy
And say what's on your mind
I search for something
To compare you to
Thought long and hard
For a simile true
Now I'm suddenly aware
End the quest you're beyond compare
So speak easySpeak easy
Speak easy
Speak easy
