## We Were Us (Duet with Miranda Lambert)

## Keith Urban & Miranda Lambert

Rearview crosses Railroad ties Oh, Hail Marys Friday nights Heartbeat baby Low-beam lights

God, I miss when you were mineBack when that song was a song I could sing along without thinkin bout you every time it came on Every beat, every line, every word, every time

When a road was a road

I could roll on through without wishin that empty seat was you Money was gas, dreams were dust

Love was fast and we were us

Shotgun sunset A cool mint kiss Backseat promise Breaking it

Floorboard feeling County lines

God, I miss when you were mineBack when that song was a song I could sing along without thinkin bout you every time it came on Every beat, every line, every word, every time

When a road was a road

I could roll on through without wishin that empty seat was you Money was gas, dreams were dust

Love was fast and we were usIn a sleepy town, just jumping in

Far too young to know that summers end

We were us, we can't go back It's what it is, but God I miss

Back when that song was a song

I could sing along without thinkin bout you every time it came on Every beat, every line, every word, every time

When a road was a road

I could roll on through without wishin that empty seat was you Money was gas, dreams were dust

Love was fast and we were usEvery beat, every line, every word, every single time I just close my eyes and youre ridin shotgun

You and me, baby, on the run

I can feel your heartbeat, baby
